Hard metal twin tip saves costs

Keep trips to the grinder rare by storing several replacement needles inside the holder and re-sharpening them all at once when blunted

TiCOM® PRIMUS hard metal scriber

Light-weight, extremely handy scriber with silvery, lacquered plastic handle. The strong chuck ensures a firm grip on the needle while work is in progress. Only after pressing the pushbutton, the feed mechanism releases the needle and transports it forward without allowing it to fall out.

With clip for attachment to a pocket - for protection, the needle is simply pushed back into the chuck head.

Solid, hard metal needle with sharpened twin tip and 35 mm length. Cost-efficient, can be re-sharpened from both sides up to a total of 10 mm.

Individual scriber in transparent package.

Cost-saving hint:

Three additional needles can be deposited in the holder. Thus another trip to the grinding machine or the tool store becomes necessary only after 8 tips have been blunted - with a sevenfold saving of time and costs! Therefore don't forget to include replacement needles in your order!

Article No.	260.1
Designation	PRIMUS hard metal scriber
Packaging	Individually in transparent package
Length	150 mm
Handle Ø	9,5 mm
Dimensions of replacement needle	35 x Ø 2 mm
Unit weight	24 g
Packaging unit	20 pieces
EAN code	4 033554 002608
